## **EXAMINER'S AMENDMENT**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 28, 2005 has been entered

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Shawna Cannon Lemon on September 27, 2005.

The application has been amended as follows:

In Claim 23, lines 2, 7 and 9, the phrase "the body cavity" has been changed to  
- - said body cavity - -.

## **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance: The Viegas et al (US Patent No. 5,587,175) is representative of the closest prior art of record. The Viegas et al patent discloses a medical device that may be used in the separation of organs, injured in surgical procedures or used to prevent the formation of undesirable adhesions as part of the healing process. Polydextrin is listed in the Viegas et al patent as film forming polymer. However, the Viegas et al patent and other prior art of record

Art Unit: 1623

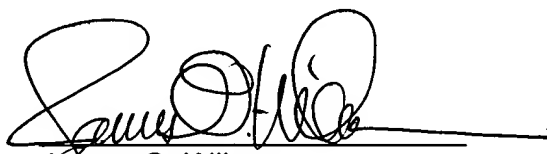

do not teach or fairly suggest a method of reducing the incidence of adhesions in a body cavity, comprising introducing into the body cavity a composition comprising a polysaccharide dextrin in an amount effective to reduce the incidence of said adhesion, wherein the dextrin is unsubstituted and the dextrin contains more than 15% of polymers with a degree of polymerization (DP) greater than 12 and acts as an osmotic agent to maintain a volume of the aqueous formulation in the body cavity serving to separate tissues which otherwise may adhere to each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Information Disclosure Statement***

4. The information disclosure statement filed July 28, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
